**Wisconsin Tornado & Severe Weather Awareness Week
April 19-23, 2004**

(MADISON) Gov. Jim Doyle has proclaimed April 19-23, 2004 as Tornado and Severe Weather Awareness Week in Wisconsin. The campaign is to remind people of the dangers associated with tornadoes, thunderstorms, flooding and hail and to encourage citizens to take protective safety measures.

"We hope all citizens use this week to brush up on their personal preparedness for severe weather. Learning about the threat of severe weather is an important step," said Wisconsin Emergency Management Administrator Ed Gleason.

Last year, Wisconsin had a relatively quiet tornado season with 14 confirmed tornado spin-ups. On average, Wisconsin experiences 21 tornadoes a year and in the last three years had experienced F3 tornadoes in Siren (2001) and Ladysmith (2002). In addition, this year marks the 20th anniversary of the Barneveld Tornado. Nine people were killed and more than 200 injured when the F5 tornado hit in the early hours of June 8, 1984.

To encourage citizens to be prepared for severe weather, Wisconsin Emergency Management (WEM) and the National Weather Service (NWS) are once again promoting Wisconsin's Tornado and Severe Weather Awareness Week. The statewide tornado drill will be held on Thursday, April 22, 2004.

Many schools and businesses participate in the annual daytime drill. Wisconsin Department of Public Instruction and WEM have distributed tornado and severe weather information to schools.

***Attached are four pages of Wisconsin severe weather information. If you need further information, please contact your county emergency management director. If you would like the material e-mailed to you, please contact Lori Getter at lori.getter@dma.state.wi.us**

Changes in the Statewide Tornado Drill

Thursday, April 22, 2004

The statewide tornado drill in Wisconsin is scheduled for Thursday, April 22, 2004. This year, to improve the testing of emergency notification, parts of the drill will be held at different times throughout the state. Below is the schedule for this year's drill with the times and counties identified. In the event of actual severe weather anywhere in the state, the drill will be postponed until Friday, April 23, 2004 with the watch and warnings issued at the same scheduled time. If severe weather occurs on Friday as well, the drill will be cancelled. For further information, contact the National Weather Service office in your area.

Issuance Time Window	National Weather Service (where message originates)	Message	Counties
1:00 p.m.	Sullivan Office	Mock Tornado Watch <i>(Tornadoes are possible)</i>	All Counties
1:20 – 1:25 p.m.	Green Bay Office	Mock Tornado Warning <i>(A tornado has been sighted – seek shelter)</i>	Brown, Calumet, Door, Florence, Forest, Kewaunee, Langlade, Lincoln, Manitowoc, Marathon, Marinette, Menominee, Oconto, Oneida, Outagamie, Portage, Shawano, Vilas, Waupaca, Waushara, Winnebago and Wood Counties
1:25 – 1:35 p.m.	Sullivan Office	Mock Tornado Warning	Columbia, Dane, Dodge, Fond du Lac, Green, Green Lake, Iowa, Jefferson, Kenosha, Lafayette, Marquette, Milwaukee, Ozaukee, Racine, Rock, Sauk, Sheboygan, Walworth, Washington and Waukesha Counties
1:35-1:40 p.m.	LaCrosse Office	Mock Tornado Warning	Adams, Buffalo, Clark, Crawford, Grant, Jackson, Juneau, LaCrosse, Monroe, Richland, Taylor, Trempealeau and Vernon Counties
1:40-1:45 p.m.	Chanhassen, Minn. Office	Mock Tornado Warning	Barron, Chippewa, Dunn, Eau Claire, Pepin, Pierce, Polk, Rusk and St. Croix Counties
1:45-2:00 p.m.	Duluth, Minn. Office	Mock Tornado Warning	Ashland, Bayfield, Burnett, Douglas, Iron, Price, Sawyer and Washburn Counties
2:00 p.m.	All	End of Drill Statement	All

What To Do Before Severe Weather Strikes

Before the Storm:

- Develop a plan for you and your family for home, work, school and outdoors.
- Have frequent drills.
- Know the county/township in which you live, and keep a highway map nearby to follow storm movement from weather bulletins.
- Have a NOAA Weather Radio with a warning alarm tone and battery back-up to receive warnings.
- Listen to local radio and television stations for further information.

A Disaster Supplies Kit Should Include:

- A 3-day supply of water (one gallon per person per day) and food that won't spoil.
- One change of clothing and footwear per person.
- Blanket or sleeping bag per person.
- A first-aid kit, including prescription medicines.
- Emergency tools, including a battery-powered NOAA Weather Radio and a portable radio, flashlight, and plenty of extra batteries.
- An extra set of car keys and a credit card or cash.
- Special items for infant, elderly, or disabled family members.

What To Do When Severe Weather Strikes

Watches & Warnings:

TORNADO WATCH: Conditions are favorable for the development of tornadoes in your area. Remain alert for approaching storms.

TORNADO WARNING: A tornado is imminent (based on weather radar information) or has been sighted by spotters. If a tornado warning is issued for your area - move to your pre-designated place of safety. SEEK SHELTER IMMEDIATELY!

SEVERE THUNDERSTORM WATCH: Conditions are favorable for the development of severe thunderstorms with damaging straight-line (downburst) winds and/or large hail.

SEVERE THUNDERSTORM WARNING: Severe thunderstorms with damaging straight-line winds and/or large hail are imminent or are occurring.

Where to Go In Severe Weather:

In a house with a basement: Avoid windows. Get in the basement and under some kind of sturdy protection (heavy table, work bench or stairs), or cover yourself with a mattress or sleeping bag.

In a house with no basement, a dorm, or an apartment: Avoid windows. Go to the lowest floor, small center room (like a bathroom or closet), under a stairwell or in an interior hallway with no windows. Crouch as low as possible to the floor, facing down; and cover your head with your hands. Even in an interior room, you should cover yourself with some sort of thick padding (mattress, blankets, etc.), to protect against flying or falling debris.

In an office building: Go directly to an enclosed, windowless area in the center of the building -- away from glass. Then, crouch down and cover your head. Interior stairwells are usually good places to take shelter. Stay off elevators - you could become trapped in them if the power is lost.

In a mobile home: Get out! Most tornadoes can destroy even tied-down mobile homes. If your community has a tornado shelter, go there fast. If there is a sturdy permanent building within close distance, seek shelter there. Otherwise, lie flat on low ground away from your home, protecting your head. If possible, use open ground away from trees and cars, which can be blown onto you.

At school: Follow the drill! Go to the interior hall or room in an orderly way as you are told. Crouch low, head down, and protect the back of your head with your arms. Stay away from windows and large open rooms like gyms and auditoriums.

In a car or truck: Get out of the vehicle immediately and seek shelter in a permanent building. Do not try to out run a tornado. If there is no shelter, lie flat and face down, protecting the back of your head with your arms.
